About the Partnership

When Morgan Tecnica and Speed Step met each other, they immediately discovered many affinities, sharing same values and same vision, while developing and offering complimentary products for the fashion industry.
Based on that, they decided to join their efforts and build a new and completely integrated solution for the end user, from CAD to PLM, taking the highest advantage of the deep knowledge and expertise of each one in each individual area, and they agreed these products to be a **Morgan worldwide exclusivity**.
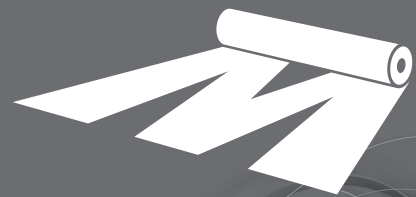

About Speed Step

Since 1995, Speed Step established themselves as a competent management information system partner to the global fashion industry.
Currently, over 200 customers (brands, buyers, retailers, importers, agents and manufacturers) are supported with an internal staff of 45 employees. The offshore development / support center in India and global marketing partnerships, reflect a true international character.
The products are developed and improved with constant feedback from customers and partners.

As a partner of the fashion industry, we understand the challenges faced by the industry and help overcome these challenges with modern IT solutions and offering several service/support solutions, which guarantee investment security and latest software applications.

Ideal for Fashion Business

MorganTecnica, in **worldwide exclusive partnership** with Speed Step, designes applications specifically to Fashion Industry. These solutions cover entire range of processes in today's globalized supply chain, in their standard form, thus minimizing customization and reducing implementation time and cost. Yet, these solutions are flexible enough to address any specific needs easily.

Being modular, you can choose to implement the solution in individual and important areas to get immediate results. Our solutions can be integrated in your existing IT-systems easily. Open and modern interfaces are the base for integration. We offer WEB-services, XML files as standard interfaces to ERP-systems such as SAP, thus guaranteeing that data is captured at its origin.

A collaborated partnership

Being a long-term Fashion Industry Partner, we have gained immense experience in design, development, implementation and support of our software solutions.

We deploy our team of experts to your company, from initial project planning till completion. With adoption of new technologies, continuous product improvement and uninterrupted support, we guarantee that your investment is protected.

Together with you, we will ensure your project is successful and reaches its objective.
